

THE DELICATE ART OF DESTRUCTION

5 REASONS YOU NEED A MASTER OF THE CRAFT

1

IN CASE YOU GET AUDITED

Certificate of destruction proves your compliance.

Try to paint a majestic landscape without any training. Sculpt a delicate bust without the proper tools. You're not going to like the results. Secure shredding and IT asset disposition is an art, too. And doing it yourself can be messy, putting your security and reputation at risk.

Here's why you need a master:

2

SO YOU DON'T MISS ANYTHING

Sensitive data is everywhere: computers, phones, medical equipment, copiers, printers, fax machines...

3

SO YOU DON'T GET BREACHED

Locked bins, secure vehicles, a traceable process so sensitive information is never just lying around.

4

TO SAVE TIME

Leave the destruction to a pro and stay focused on your business.

5

TO KNOW WHAT TO DESTROY

Legal pros advise and ensure proper handling according to the latest regulations.
